CAREER OBJECTIVE

Computer Science undergraduate with a strong foundation in programming, data structures, and object-oriented concepts. Seeking an opportunity in software development to apply core concepts, contribute to real-world applications, and grow as a developer through hands-on problem solving and exposure to modern technologies.

EDUCATIONAL QUALIFICATIONS

- **B.Tech in Computer Science & Engineering (CSE)** 2022 – 2026
College of Engineering Chengannur, Chengannur
CGPA: 8.03

SKILLS

Programming: Java, Python, C

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Backend: Spring Boot, Flask, REST APIs

Web: HTML, CSS, JavaScript, MySQL

Tools: Git, GitHub, VS Code, Docker, Linux

PROJECTS

Cryptify: A Tool for Symmetric Data Encryption

Python, Flask, HTML, CSS

- Developed a user-friendly encryption-decryption tool to securely encrypt and decrypt text or files.
- Implemented symmetric key algorithms such as AES, 3DES, Twofish, and Blowfish.
- Prepared technical documentation and presentation explaining system flow and encryption process.

Heart attack prediction and alert system (Ongoing)

ESP32, AD8232, CNN-BiLSTM, Python, Twilio API

- Wearable, real-time ECG monitoring and alert system for early detection of cardiac events.
- Designed and implemented the alert logic to trigger notifications based on model prediction thresholds.
- Integrated Twilio API to send automated WhatsApp notifications and initiate emergency calls and SMS.
- Collaborated with team members responsible for ECG data acquisition and model development.

Decision Companion System

Java, Spring Boot, Docker, REST APIs

- Developed a web-based decision support system using Spring Boot implementing Multi-Criteria Decision Making (MCDM)
- Implemented Weighted Sum Model (WSM) and TOPSIS algorithms to rank alternatives based on user-defined criteria
- Built REST APIs for evaluation and integrated AI advisory module using Gemini API for suggestions
- Containerized and deployed the application using Docker on Render with production-ready build setup

CERTIFICATIONS

- NPTEL Data Structure and Algorithms using Java (Issued by IIT Kharagpur)
- Java (Basic) Skill Certification (Issued by HackerRank)
